ABOUT ME

I am a passionate and results-driven Frontend Developer with a strong foundation in HTML, CSS, JavaScript, **Next.js**, **React.js**, and **Redux**. With hands-on experience building dynamic, responsive, and user-friendly web applications, my goal is to deliver high-quality, performant solutions that adhere to international standards.

I focus on writing clean, efficient code while leveraging modern UI/UX principles to create seamless, intuitive digital experiences upto **20%**. Whether optimizing for performance or enhancing the user interface, I ensure that every project I work on is not only functional but also aesthetically pleasing and user-centric upto **60~90%**.

EXPERIENCE

Freelance Web Developer

Designed and developed responsive websites for small businesses using React.js, Next.js, JavaScript, and CSS.

I've worked on real-world projects involving React.js, Redux, and API integrations, focusing on scalability and performance.

I also built a professional school website using React and modern UI frameworks, ensuring smooth navigation and SEO optimization.

EDUCATION

Bachelor of Science in **Software Engineering**
